

This can be printed out on a half sheet and highlighted and stapled on the front of the pt info packet and maybe add a nice graphic or something?

- Please avoid all NSAIDs (Ibuprofen, aspirin) for 10 days prior to your procedure.
- One day before your procedure, remember to trim the hair on your scrotum (may use beard trimmer or scissors- a razor is ok but not necessary).
- Your pre-procedure anxiety medication should be ready for you at your pharmacy. Please take one hour prior to your appointment and be sure to have a driver to and from the clinic.
- Don't forget to eat your normal breakfast.
- Remember to bring your supportive undergarments (jock strap or snug briefs).
